

Declaration of independence

I certify that I have written this thesis independently and have not used any sources or aids other than those specified, that all statements taken verbatim or in spirit from other writings have been identified and that the thesis has not been used in the same or a similar form for other examinations and has not been submitted to any other examination authority.

I have clearly labelled all passages that are taken from other works in terms of wording or meaning (including translations) as borrowed material, stating the exact source (including the World Wide Web and other electronic data collections). This also applies to attached drawings, pictorial representations, sketches and the like.

In addition, I confirm that when using IT/AI-supported tools, I have listed these tools in full in the "Overview of tools used" below with their product name and version number, my source of supply (e.g. URL) and details of use, and that I have completed the checklist truthfully. Excluded from this are those IT/AI-supported writing tools that were classified by my responsible examination office as not subject to notification by the time I submitted my thesis ("whitelist"). In the preparation of this thesis, I have consistently acted independently and with control over the use of IT/AI-supported writing tools.

I am aware that in the event of violations of these principles, a procedure for attempted cheating or deception will be initiated in accordance with the subject-specific examination regulations and/or the interdisciplinary statutes governing admission, studies and examinations at Humboldt-Universität zu Berlin (ZSP-HU).

Whitelist

The following programmes do not have to be listed or evaluated. These programmes can be used without further information:

- ✓ Microsoft Office, LaTeX, OpenOffice, iWork, Google Docs
- ✓ Google Scholar, ResearchGate, Web of Science
- ✓ Databases of the university library
- ✓ Reference management programmes (Zotero, Endnote, Mendeley, etc.)

Overview of tools used

Completion instructions:

Please indicate which programmes you have used in your work. Please enter which programme you used for each type of use. Several programmes can be entered for each type of use. If you have used a programme in a different way than listed in the table, please add this type of use in the fields provided.

If you are unsure whether a programme falls under "artificial intelligence", please enter it. You will not suffer any disadvantages by naming the programme.

Checklist: IT/AI-supported writing tools:

Type of use	Programme	If relevant: sections concerned (Please indicate page numbers if not applicable to the entire document).
Generating ideas/brainstorming	ChatGPT	General thesis structure
Literature research		
Translations of texts		
Summarising sources		

Have content explained in a different way (e.g. constructs, methodological approaches, analyses)	ChatGPT	
Creating text sections that serve as a template	ChatGPT	
Revision of your own text elements (please indicate the number of pages of the paper)	ChatGPT	
Analysing data (e.g. writing codes, defining suitable evaluation methods, creating illustrations)	ChatGPT, Codex	R code, Shiny app, documentation
Spell checking, grammar and writing style	ChatGPT	
Visualisations for illustrative or decorative purposes		

Further explanations if necessary:

OpenAI ChatGPT was used with the latest available model at the respective time of use. It was used throughout the writing process for revision of my own text, grammar and style checking and improvement of scientific wording. OpenAI Codex and ChatGPT were used primarily for programming support, especially for creating and revising R functions, developing the Shiny app, troubleshooting code and preparing the documentation. The final content, scientific decisions and responsibility for the thesis remained with the author.
